

A21 | Fzd4 enrichment recurs in an independent capillary dataset

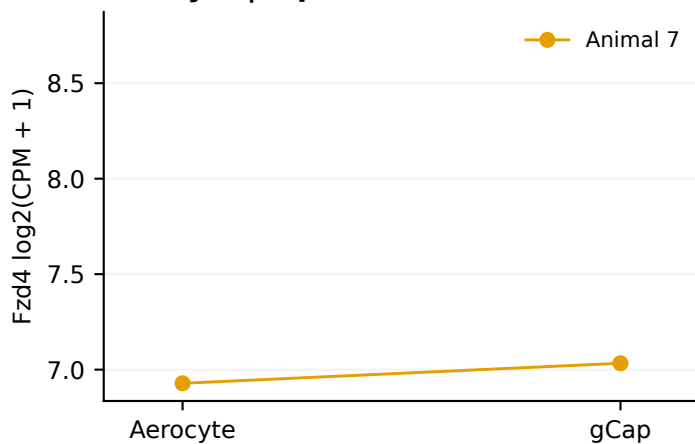

A Control | 3 paired animals

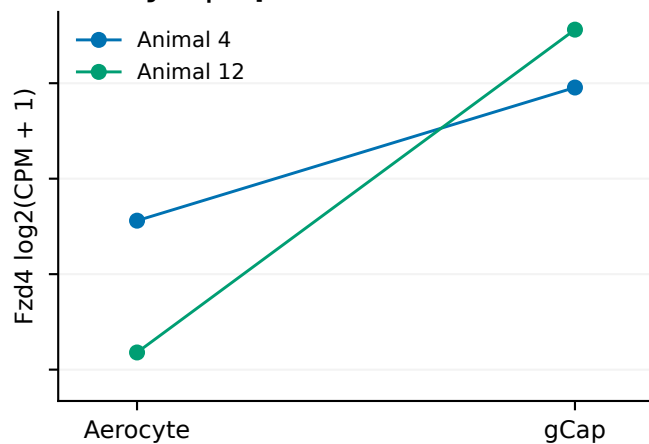

B Day 3 | 1 paired animal

C Day 5 | 1 paired animal

D Day 7 | 2 paired animals

GSE211335: 12 animals, 3 per condition. Pairs require ≥ 20 cells per state; lines join states within the same animal. Seven pairs qualify. RNA enrichment does not establish renewal, receptor engagement or vascular function.
