

A21 | Cohort identity qualifies the original expression lead

A Existing day-42 cohort, resolved metadata

Source mouse	Round	Label cohort	Sex	Ki67 reporter
124	2021	2	F	Cre/Cre
125	2021	7	M	Cre/Cre
126	2021	14	M	Cre/+
127	2021	21	M	Cre/Cre
179	2022	2	M	Cre/+
180	2022	7	F	Cre/+
181	2022	14	F	Cre/+
182	2022	21	M	Cre/+

Each label cohort occurs in both rounds; reporter genotype and sex are imbalanced. These are Ki67 reporter genotypes, not Fzd4 perturbations. Eight mouse samples and original estimates are reused from Nb2. Resolving metadata does not create independent replication.

B Original Nb2 association, reused evidence
