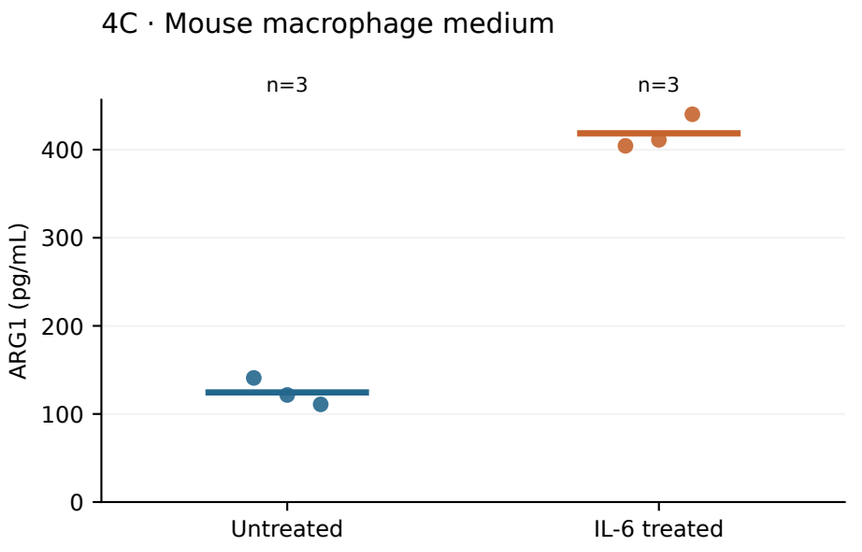
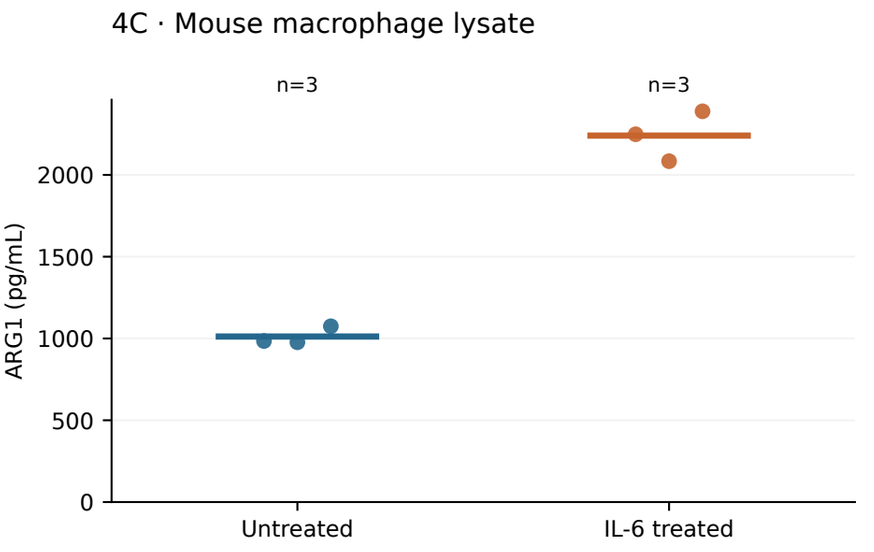
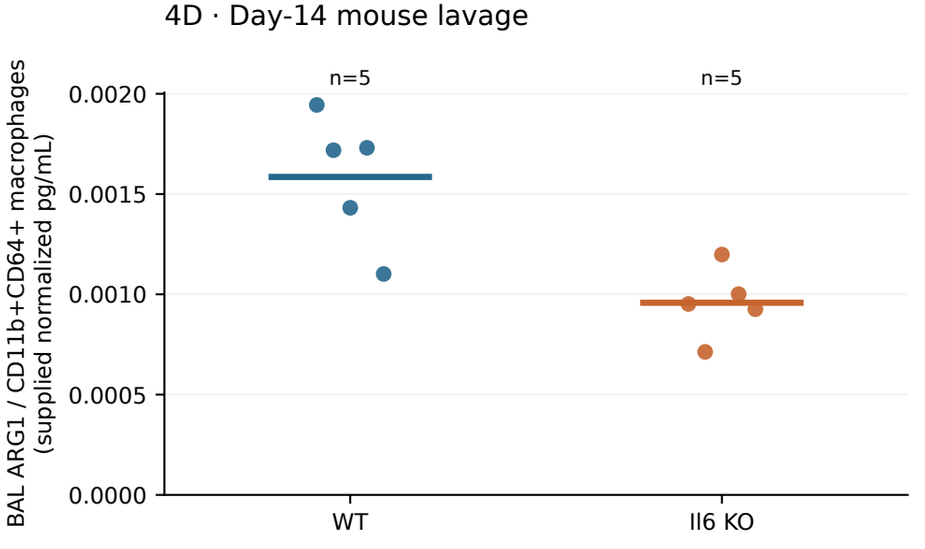
Published workbook source marginals · ARG1 readouts







Each dot is one supplied observation; horizontal bars show arithmetic means. SD and full ranges are in the tables.
4C workbook amplitudes differ visibly from the supplied PDF; exact graph concordance remains unresolved.
4D retains macrophage-count normalization and the supplied qPCR zero. No inferred pairing across assays.
Published-source reuse; preparation/donor links to R1 are unknown. No tests, confidence intervals, mediation or flux claim.
