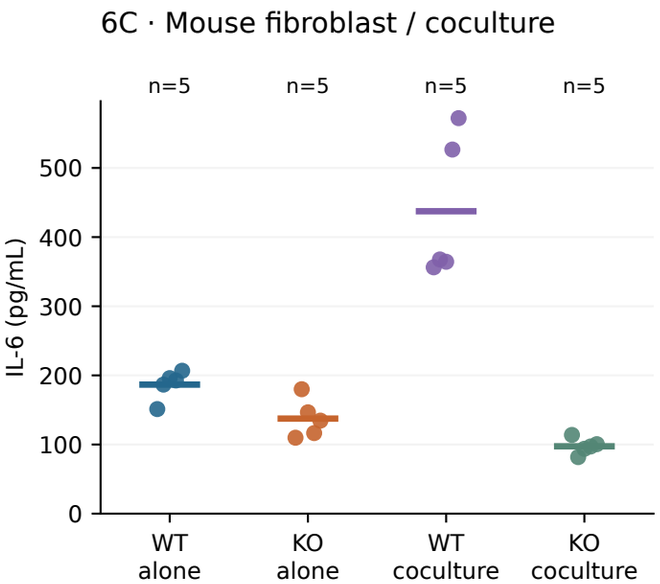
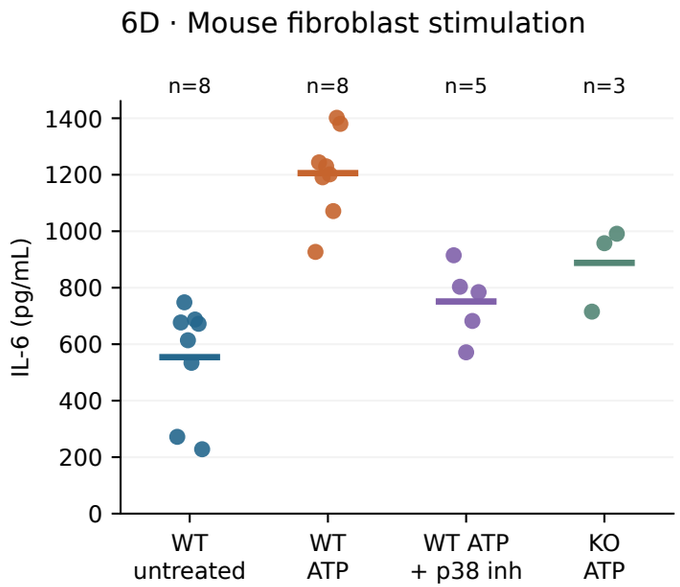
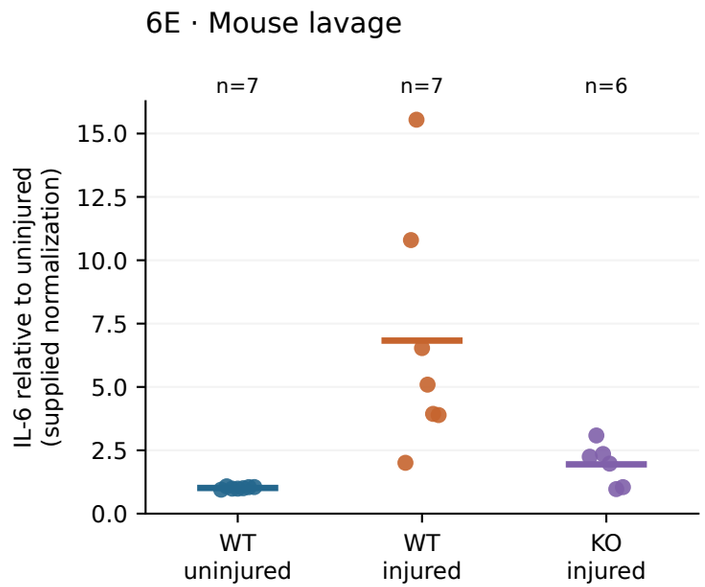
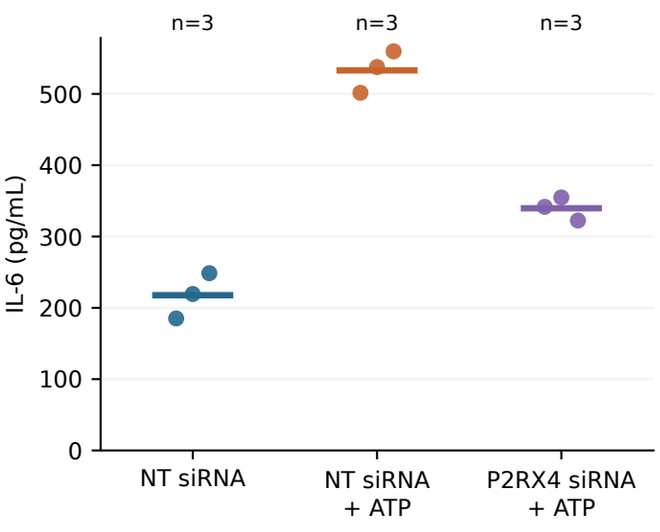
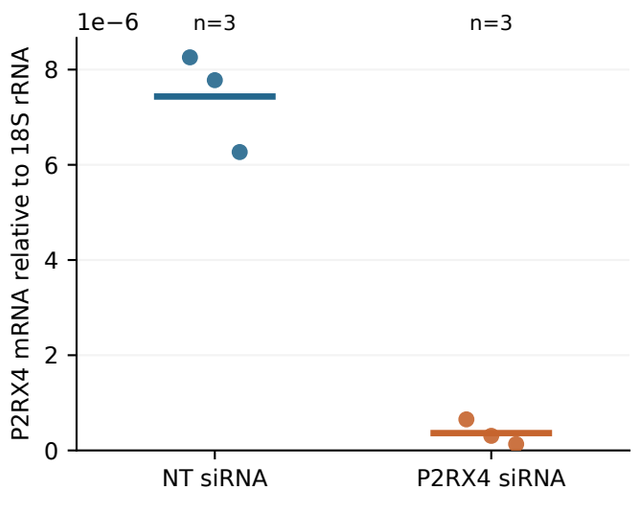
Published workbook source marginals · IL-6 and knockdown readouts











Each dot is one supplied observation; horizontal bars show arithmetic means. SD and full ranges are in the tables.
6E retains supplied normalization relative to uninjured; it is not absolute pg/mL. ATP = ATPgammaS.
No KO untreated (6D), KO uninjured (6E), or KD unstimulated (6F) arm is imputed; no full interaction is estimated.
Published-source reuse; preparation/donor links to R1 are unknown. No tests, confidence intervals, mediation or flux claim.
