Primary log2(CPM + 1) contrasts • fixed background excludes all Figure 5 targets
Noisy axes share PBS; fitted amplitude is descriptive, not a causal fraction
10-DE response pattern
5A up
5A down
Equal responses
Background beta=0.376
10-DE − PBS
WT − PBS
super-10 response pattern
5A up
5A down
Equal responses
Background beta=0.645
super-10 − PBS
WT − PBS
